Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 6 the statementsliders being interrelated parameters having dimensional elements extending through said dimensional elements with each..." is not understood.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Davis et al #5615347.

3. Davis et al disclose a software system that constraints certain parameters. The system includes a plurality of interrelated parameters (52,66,68), a plurality of displays and means for maintaining the parameter constraints/extension (102+ in fig 2g.) The system maintains a mathematical relationship of 1 to 1. Regarding claims 6-9: As can be best understood the features of the claims are provided for.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Winkler #5345362 in view of Davis et al #5615347.

6. Winkler discloses a portable medical monitor. Not disclosed is providing the display components. Davis et al disclose a software system that includes an energy saver selection screen with sliders that function as defined in the claims. It would have been obvious to one of ordinary skill in the art to provide the medical device of Winkler with the energy saving software as taught by Davis et al to conserve power in that device. This would therefore make the method of providing Davis et al's components to a medical device obvious.

7. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Winkler in view of Davis et al as applied to claim 10 above, and further in view of King et al #5491782.

8. King teaches adding a lower slider to a display to move two controls simultaneously. To add this feature to the proposed combination to allow movement of two sliders and add an additional feature to the software would have been obvious to one of ordinary skill in the art given King et al's teaching.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
